RE: Security / Playground / Rodents

I'm writing this letter to inform you of the problems and concerns that us residents are having with Georgia King Village. Our first concern is the Playground. We appreciate the new playground, but to finish it with rocks was the wrong decision. There are many windows being broke and children being hurt behind pure negligence. There is a lack of activities for the children in GKV to do, and with the space you have in the towers there should be more available activities for the residents. There use to be a lunch program during the summer, what happened to that.

The second issue is the Lack of security and protection in GKV. Within the last couple of months, there have been several shootings and acts of violence on several residents of GKV. There is a lack of security in the townhouses at night and during the day. There are little to no lighting in the townhouses at night and on the streets and porches. How can you continue to allow these things to go on? We took pictures for security gates that are always open. How can you expect us to pay more money for rent if we can't feel safe in our own homes?

The third problem is these rodents. The rodent problem is getting out of hand. There are mice camping out in the walkways outside, making it uncomfortable for us residents to sit outside and relax. We feel there should be more trashcan accessibility outside and around the playground area. We are asking for your immediate attention on these matters.
